Name on Card: _____ Billing Zip Code: _____

Signature: _____

Domain transfers usually take several days. Please note that you are "leasing" not "purchasing" a domain name; if the annual domain renewal fee is late or not paid, the Registry will release and re-sell the domain name.

The monthly fee for a domain under 30 megs of space is \$30 per month, billed annually in one payment of \$360. A domain larger than 30 megs is \$45 per month (billed annually in one payment of \$540). This fee includes: FTP access so you can change your own website at any time; virtual email; weblogs; one link from an applicable area of Nantucket.net; placement as a featured web site of the week; site submission to the top search engines; and discounts on banner ads at Nantucke.net and at NantucketWeddings.com. Nantucket.net is happy to assist domain clients in setting up their FTP programs. Additional assistance in coding, webwriting, and scripting is available per hour at our regular consulting fees. There is an additional monthly fee for a secure site.

If you want to register your name to protect it for future use, we can hold a domain that does not yet have a website for just \$120 a year. If you are registering two domains and want them to point to the same website, then the second domain will be charged for a "redirect" instead of a full hosting fee.
